Recent Focus | Acceptance & User Experience

The screenshot displays the ADONIS Business Transformation Suite interface. At the top, there is a navigation bar with options like 'Read & Explore', 'Find', and 'Analyse'. Below this, a user is greeted with 'Hi Peter!'. A search bar contains the text 'loan application'. The main content area shows a 'Process Map ADOMoney Bank 1.00' with a dropdown menu for 'Select start model'. The process map is divided into two columns: 'Management processes' and 'Core processes'. The 'Management processes' column lists 10 items (MP.01 to MP.10), with MP.06 'Manage Compliance' highlighted. The 'Core processes' column lists 6 items (CP.01 to CP.06), with CP.01 'Advise Customer' highlighted. On the right side, there is a vertical sidebar with the ADOMoney Bank logo and a search icon.

Make consuming process information a light-weight, intuitive habit.

Recent Focus | Collaboration & Communication

The screenshot displays the ADONIS software interface. At the top, there's a navigation bar with options like 'Design & Document', '+ New', 'Find', 'Analyse', and 'Setup'. Below this, a process flow diagram is visible, showing steps such as 'New customer account', 'Interview customer', 'Prove/Provide identity', and a decision diamond '04' with branches for 'Individual person' and 'Legal entity or an individual?'. Overlaid on the interface are two comment streams. The left stream shows a comment from 'AP' (Adonis Power) asking to confirm numbers, followed by a reply from 'Adonis Power (ado)' confirming the numbers, and another reply from 'CP' (Customer Process) suggesting a discussion. The right stream shows a comment from 'AP' asking for confirmation of estimates, followed by two more comments from 'AP' regarding risk assessment and data recording, and a final comment from 'Adonis Power (ado)' about performing KYC activities.

Recent Focus | User & Configuration Autonomy

The screenshot displays the ADONIS software interface. At the top, there is a navigation bar with options like 'Design & Document', '+ New', 'Find', 'Analyse', and 'Setup'. Below this, a breadcrumb trail shows 'OUs, Processes and IT status'. The main area is titled 'Box-in-Box' and contains a grid of organizational units (OUs) and their associated processes. Each OU is represented by a box containing a process name and a list of applications. For example, 'Business customers' includes 'CP.01 Advise Customer' with applications like 'Business Partner', 'Partner System (PAS)', and 'STANDARD Banking'. Other OUs include 'Internal revision', 'Loan Back Office', 'Mid-Office', and 'Payment transactions'. On the right side, there is a 'Options | Colour' panel with a 'Check out available templates for your dataset!' section, a 'Select' dropdown, and 'Rename' and 'Delete' buttons. Below this is a diagram showing the relationship between 'Organisational Unit via Assigned processes', 'Process from dataset', and 'Application via Referenced applications'. At the bottom right, there are settings for 'Level 1', 'Level 2', and 'Level 3' with 'Boxes per row' values (20, 1, 1) and 'Update view' and 'Save template' buttons.

Create and save new chart templates directly as a User!

Recent Focus | User & Configuration Autonomy

The screenshot shows a web application interface with a dark header bar containing a home icon, 'Home', 'ADOMoney Bank', and 'More options' buttons. Below the header, the main content area is divided into sections: 'Welcome, Adonis!', 'Users & Access Rights', 'Libraries & Repositories', and 'Product Configuration & Licence'. Each section contains sub-items with brief descriptions. A large white box with a purple border highlights the 'Properties' section, which includes the text: 'Add, change, remove and organise properties of object and model types'.

Future Focus | AI Process Design Assistant

The screenshot displays the ADONIS AI Assistant interface. The main window shows a process flow diagram for 'Purchase to pay process 0.01'. The flow starts with 'Start purchase request', followed by 'Create purchase requisition', 'Approve requisition by manager', a decision diamond 'Requisition approved?', 'Revise requisition' (if No), and 'Generate' (if Yes). An 'AI Assistant' panel is open on the right, featuring a 'Design' tab and an 'Improve' tab. The 'Design' tab is active, showing the prompt 'Generate process proposal with AI' and two radio button options: 'From process description' (selected) and 'From model name'. Below the options is a text input field containing 'Create a purchase to pay process'. A 'Process complexity' slider is set between 'Less' and 'More'. A list of process steps is visible at the bottom right, including 'Revise requisition', 'Generate purchase order', 'Send purchase order to supplier', 'Supplier confirms order', 'Confirmation received?', 'Follow up with supplier', and 'Receive goods'.

Let AI smart-up and inspire your process design. Benefit from existing knowledge. Use your time for refining a draft, rather than creating it.

Future Focus | Process Wizard

The screenshot shows the ADONIS Process Wizard interface for creating a 'Process purchase order'. The interface includes a top navigation bar with 'Happy path modeler', '+ New', 'Find', and 'Analyze' options. The main content area is divided into three numbered steps:

- Step 1:** 'Purchase order received' (indicated by a yellow circle).
- Step 2:** A list of tasks with associated roles and application dropdowns:

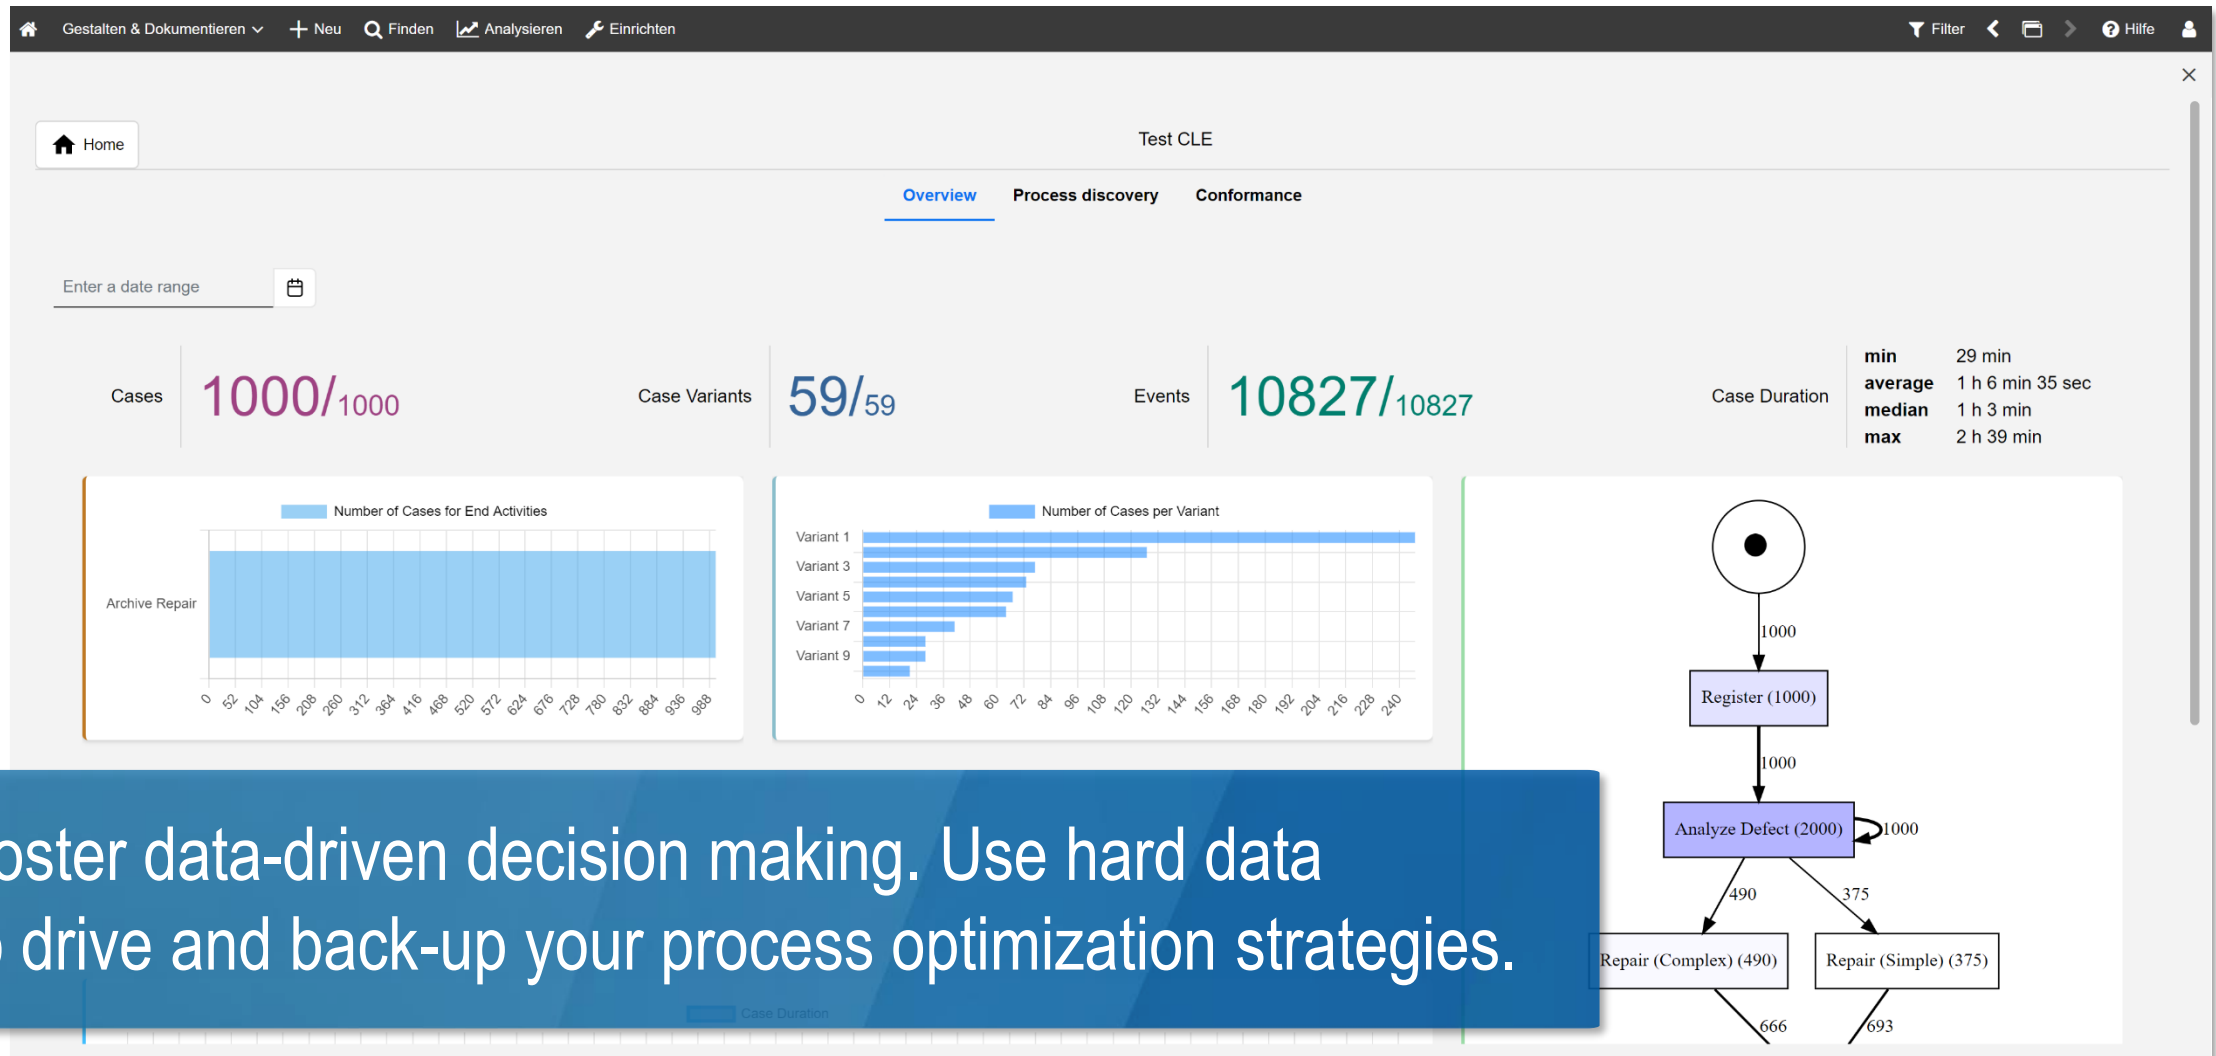

Task	Role	Application
Check stock availability	Warehouse assistant	Select applications
Confirm order	Warehouse assistant	Select applications
Emit invoice	Back office assistant	Invoice Management...
Package goods	Warehouse assistant	Select applications
Ship goods	Warehouse assistant	Select applications
Archive order	Back office assistant	Select applications
- Step 3:** 'Graphical preview' showing a flowchart for the 'Warehouse assistant' role. The flow starts with a yellow circle, followed by 'Check stock availability', 'Confirm order', and 'Package goods' tasks.

A blue callout box on the right side of the interface contains the text: 'Involve non-experts in process creation with easy non-graphical process modelling.'
