ADONIS and AI: not a new romance 😊

The screenshot shows the ADONIS Translation Service interface. The main window displays a comparison between the English (Primary Language) and German descriptions for the process 'CP.02.01-O Create a loan application (private customer, online)'. The English description is: 'The process covers the processing of the application and the credit score. The maximum loan amount is predefined in the system so that only small loan can be applied for online.' The German description is: 'Der Prozess umfasst die Kredit-Antragsbearbeitung und die Bonitätseinstufung. Die maximale Kredithöhe ist im System vordefiniert, sodass ausschließlich Kleinkredite online beantragt werden können.' A blue box highlights the 'Auto-translate from German' button in the German description editor.

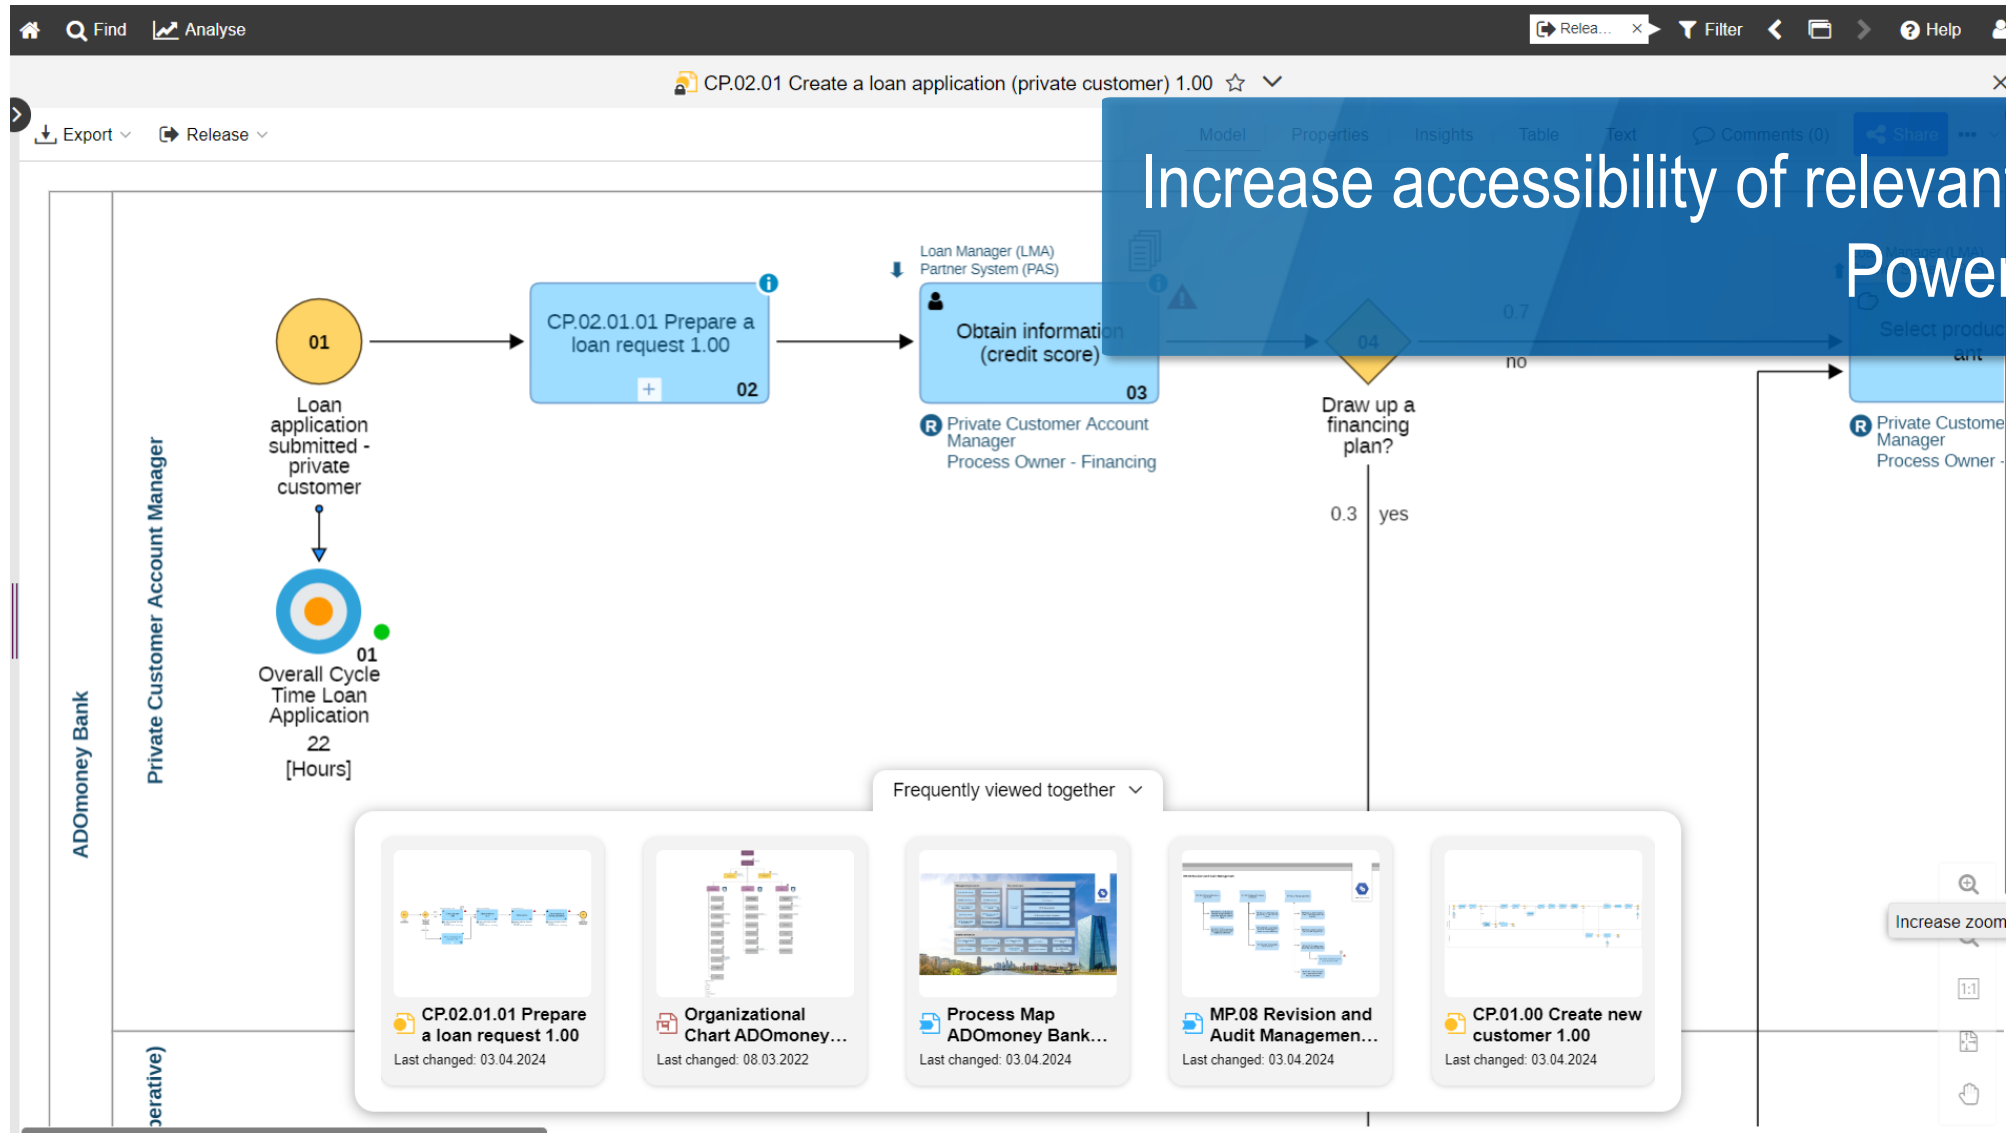

Attribute	English (Primary Language)	German
Name	CP.02.01-O Create a loan application (private customer, online)	KP.02.01-O Kreditantrag erstellen Privatkunde (online)
Description	The process covers the processing of the application and the credit score...	Der Prozess umfasst die Kredit-Antragsbearbeitung und die Bonitätsei...
Aim*	The applicant has to be checked according to guidelines toward credit-w...	Der Antragsteller muss gem. den Richtlinien in Richtung Bonität und S...
Trigger*	Application of a customer for a private loan.	Anfrage eines Kunden für Privatkredit
Result*	Approval or rejection of an online credit application	Annahme oder Ablehnung des Kreditantrags

Translation Service (2016)

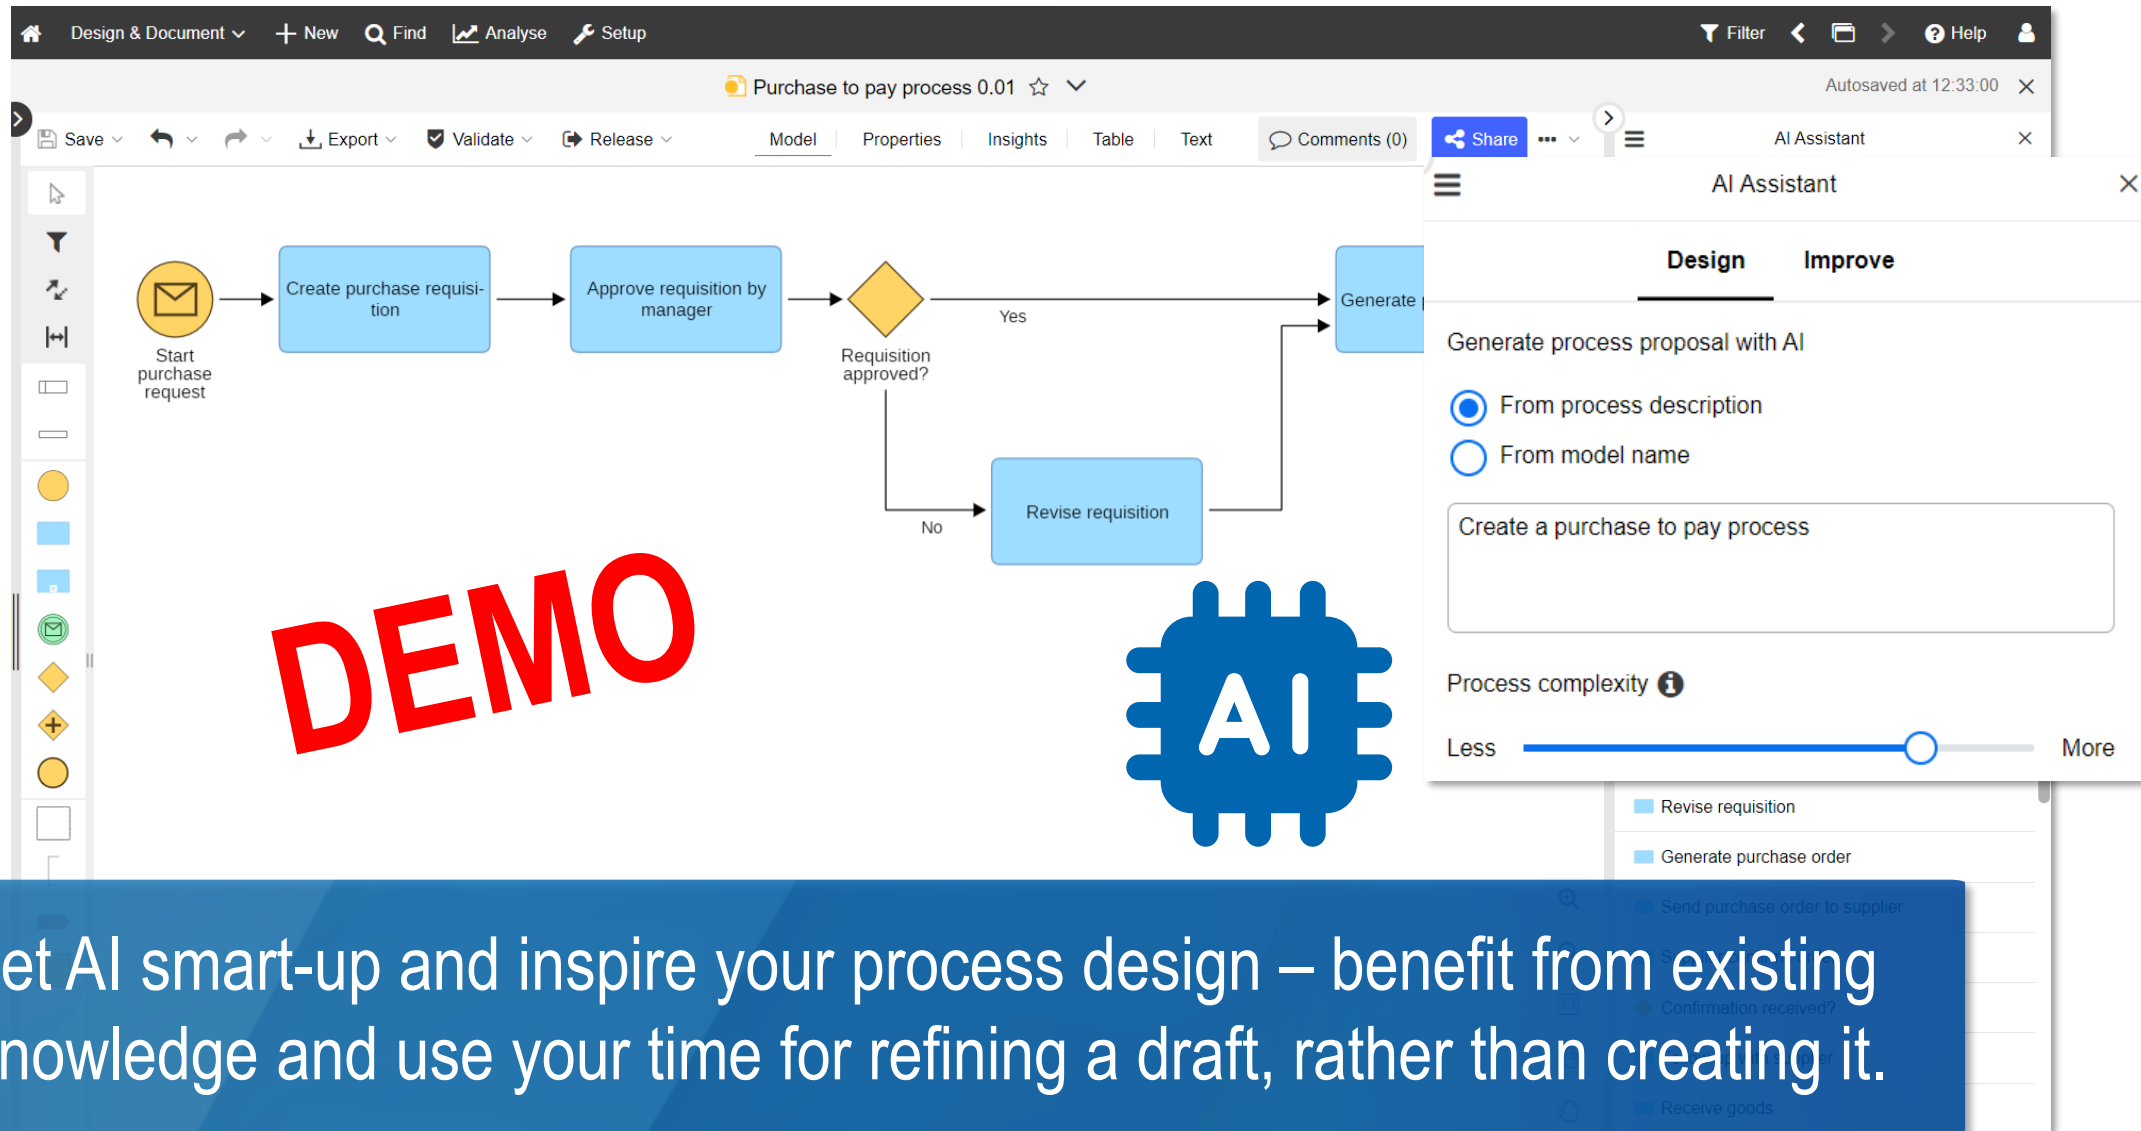

Elli, ADONIS Chatbot Starter Edition (2020)

The screenshot shows the Elli chatbot interface. The chatbot is named 'Elli, the ADONIS bot'. It provides a list of things it can help with, including finding content and business processes. The chatbot's response is: 'I'm Elli, the ADONIS bot. Here are a few things I can help you with: Find content: Find elements of a specific type. You can say: find processes, find all documents etc. Find elements based on certain criteria. You can say: find processes with high automation potential, find risks where impact is high, etc. Search by keyword. Just say: search for credit, search for CP.01 advise customer etc. Learn about ADONIS: Learn by exploring the ADONIS help. Simply say: learn how to create a report, learn about validation, learn about insights etc. If you want to cancel the conversation at any point, simply say: cancel, or OK. Try it out! I am thrilled to assist you. Was this helpful?' The chatbot is also shown in a 'Relationships Network' view, which displays a graph of relationships between different entities.

AI and Data Privacy

Balancing innovation and security

ADONIS

Business Transformation Suite

AI Needs (Your) Business Data

...And the ways to protect it

On-premise AI

Run and use AI services and models locally

Data doesn't leave the company

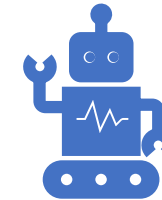

Cloud-based AI

Run and use AI at major cloud service providers (e.g. AWS, MS Azure, Google Cloud etc.)

Data in the existing cloud infrastructure and applications

Enterprise-grade security, privacy and regulatory compliance

AI-as-a-Service

Use AI services (e.g. ChatGPT, API) using a company account

Data in the AI service-provider own infrastructure

Compliance with regulatory standards, data NOT used for training of AI models

How do you run and use AI-based services within your company?

① Start presenting to display the poll results on this slide.

A group of people in a meeting are clapping their hands. The image is a close-up, shallow depth-of-field shot focusing on the hands and forearms of several individuals. The people are dressed in business casual attire, including light-colored shirts and jackets. The background is bright and out of focus, suggesting a well-lit indoor space like a conference room. The overall mood is positive and celebratory.

BEFORE YOU LEAVE...
